

GITHUB

GitHub

- ❑ Git is an open source version control software used to track changes in code.
- ❑ GitHub is a web-based Git repository hosting service.
- ❑ You can host your code on GitHub for free and keep track of changes to it!
- ❑ Need to pay GitHub for private repositories.

GitHub

- Go to <https://github.com/> and create a profile

GitHub

- ❑ GitHub actually has a fantastic training guide!
- ❑ Start with:
<https://guides.github.com/activities/hello-world/>
- ❑ Then continue on to: <https://training.github.com/kit/courses/github-for-everyone.html>

GitHub

- ❑ Make sure to post personal projects that use code to GitHub!
- ❑ Have them be presentable with README files!
- ❑ Recruiters look at GitHub for potential hires.
- ❑ GitHub also has its own Job Search tool!

GitHub Homework

- ❑ Create a GitHub account
- ❑ Follow Hello World Tutorial
- ❑ Check out Basics of Training Link
- ❑ Fork an interesting project
- ❑ Push some code to GitHub
